

**characteristics**

**headboard:** structure made of particle board panels and solid wood, upholstered with polyurethane with double fabric lining. Flexible aluminum mechanism.

**upholstered bed frame:** internal support made of particle board panels upholstered with expanded polyurethane with double fabric lining.

**upholstered tall bed frame:** internal structure made of particle board panels and shaped expanded polyurethane with double fabric lining.

**slat base:** made of a metal frame and wooden slats; for the storage and fixed version the slat base is flush with the top of the bed frame; for the loose version the slat base can be placed in 7 different positions to accommodate mattresses of different heights. In the fixed version the slat base is a single platform for W 150 and 160 cm; for the W 180 and 193 cm size the slat base is divided in two. **We do not recommend the use of these slat bases with latex mattresses.**

**covers:** removable fabric covers or fixed leather or Eco-leather covers.

**limitations**

no made to measure solutions are possible.

**legs**

black chrome finish for upholstered bed with feet or black nylon for upholstered tall bed frame.
